BRINGING HOPE TO THE WORLD

"To those suffering from rare, incurable diseases, 'hope' is a cruel word, because making their hopes come true is next to impossible. But I stand here today to tell them to have hope, because TerraCure strives to create a world where everyone can have hope." ~ Dr. Damian Brown, CEO

Based in New York City, TerraCure Pharmaceuticals runs a teaching hospital for experimental cures.

••• TERRACURE'S TEACHING HOSPITAL •••

World-class doctors and a caring nursing staff operate under the direction of Dr. Damian Brown, the CEO of TerraCure Pharmaceuticals and TerraCure's lead researcher, attempting to discover breakthroughs that will eradicate previously incurable illnesses.

Dr. Brown and the entire TerraCure team will relentlessly pursue a positive resolution to every case, no matter how difficult, by pursuing the latest technology and the cutting edge of science.

MEET LUNA

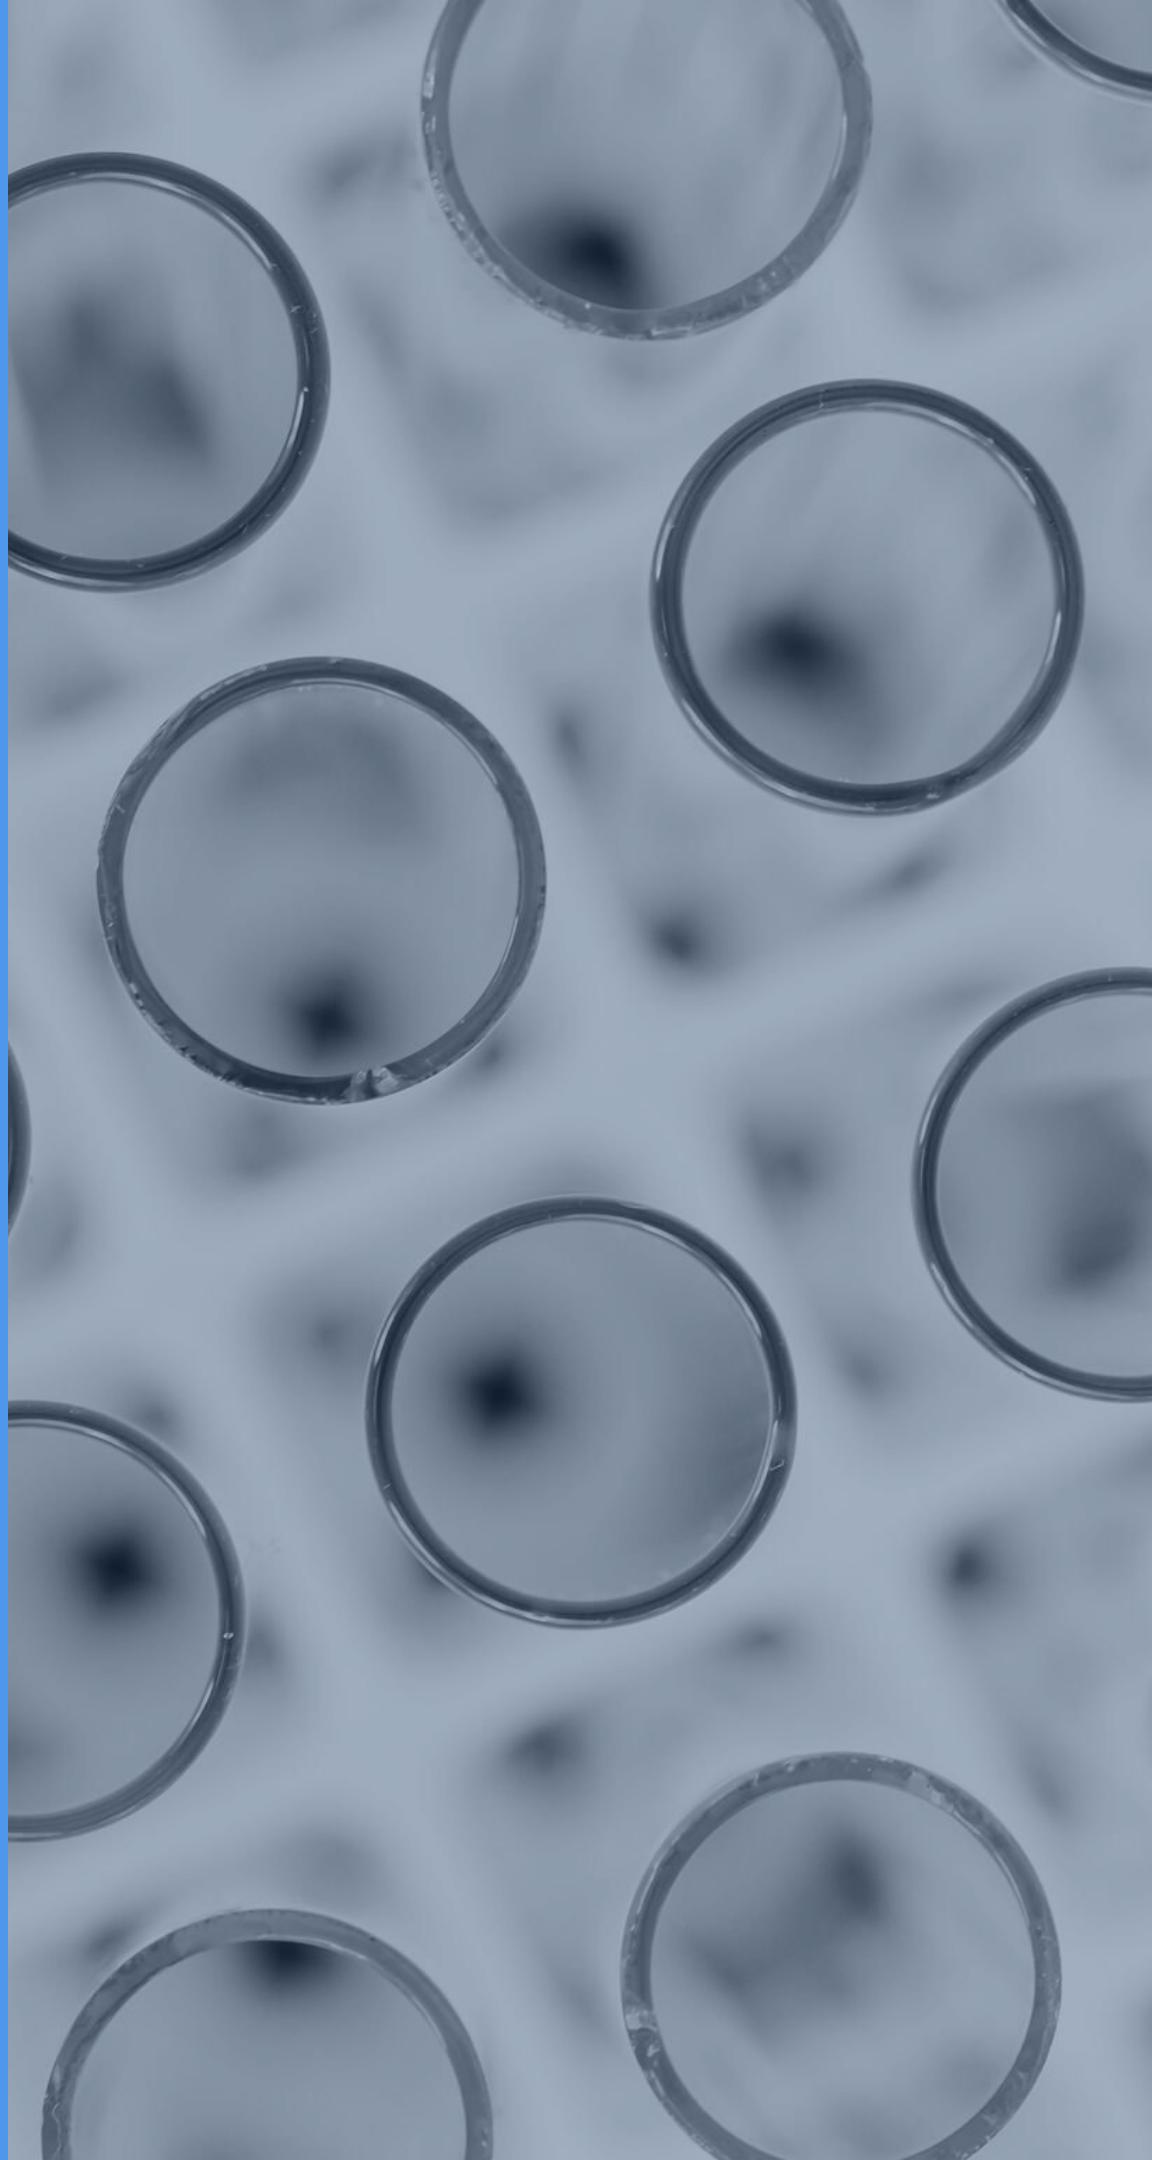

This eight year old girl doesn't let her undiagnosed seizure condition dim her hopes for the future.

In the care of TerraCure, Luna, and her mother, Olivia, know they are in good hands.

BUT
DR.
BROWN
HAS A
SECRET

He is his own patient.

*His fate is tied to the fate of
New York City...*

...and the fate of my daughter.

Worst of all, I'm the only one who knows.

*My name is
OLIVIA MOORE.*

*Ever since I
snuck into that
medical
conference in a
desperate
attempt to save
my daughter,
I've had...*

**WEREWOLVES GOING
CRAZY OVER ME**

The television adaptation of this popular comic is a blend of the medical procedural elements of HOUSE and the supernatural soap of TRUE BLOOD, MTV's TEEN WOLF or VAMPIRE DIARIES.

PILOT

Although a graduate of medical school, OLIVIA, as a young widow and mother of a sick child, LUNA, had to drop out of her residency program and now works nights at the MOONDANCE DINER.

One night, two dangerous men threaten her. Shockingly, just as one is about to assault her, the other shoots him dead and flees. Olivia hides, waiting for the cops... but by the time help arrives, the body (and all evidence) is gone! Dismissed as a crank, she is released to go home. On her way back to Luna (her daughter, who is with Olivia's BFF), she finds a handsome man – bleeding.

The victim of the same attackers, the stranger is in desperate need of help. Her medical training allows her to stitch him up. In his delirium (and shirtless) he calls her JULIA and kisses her. Strange – but not entirely unpleasant.

She leaves him unattended in the alley just long enough to call paramedics – and when she returns, he's GONE.

Then, her BFF calls, frantic – Luna has had another seizure. She needs to go to the hospital!

With her daughter's life on the line, Olivia fakes her way into a medical conference, using a friend's press badge (okay, Max may be *more* than a friend, call it "complicated", but that's a story for another time).

She hears an inspiring speech about a new hospital dedicated to cutting-edge scientific research. When she enters the conference room where "Dr. Damian Brown, the CEO of TerraCure Pharmaceuticals & Hospital" is wowing the crowd, she sees – the man she saved in the alley! The man who kissed her!

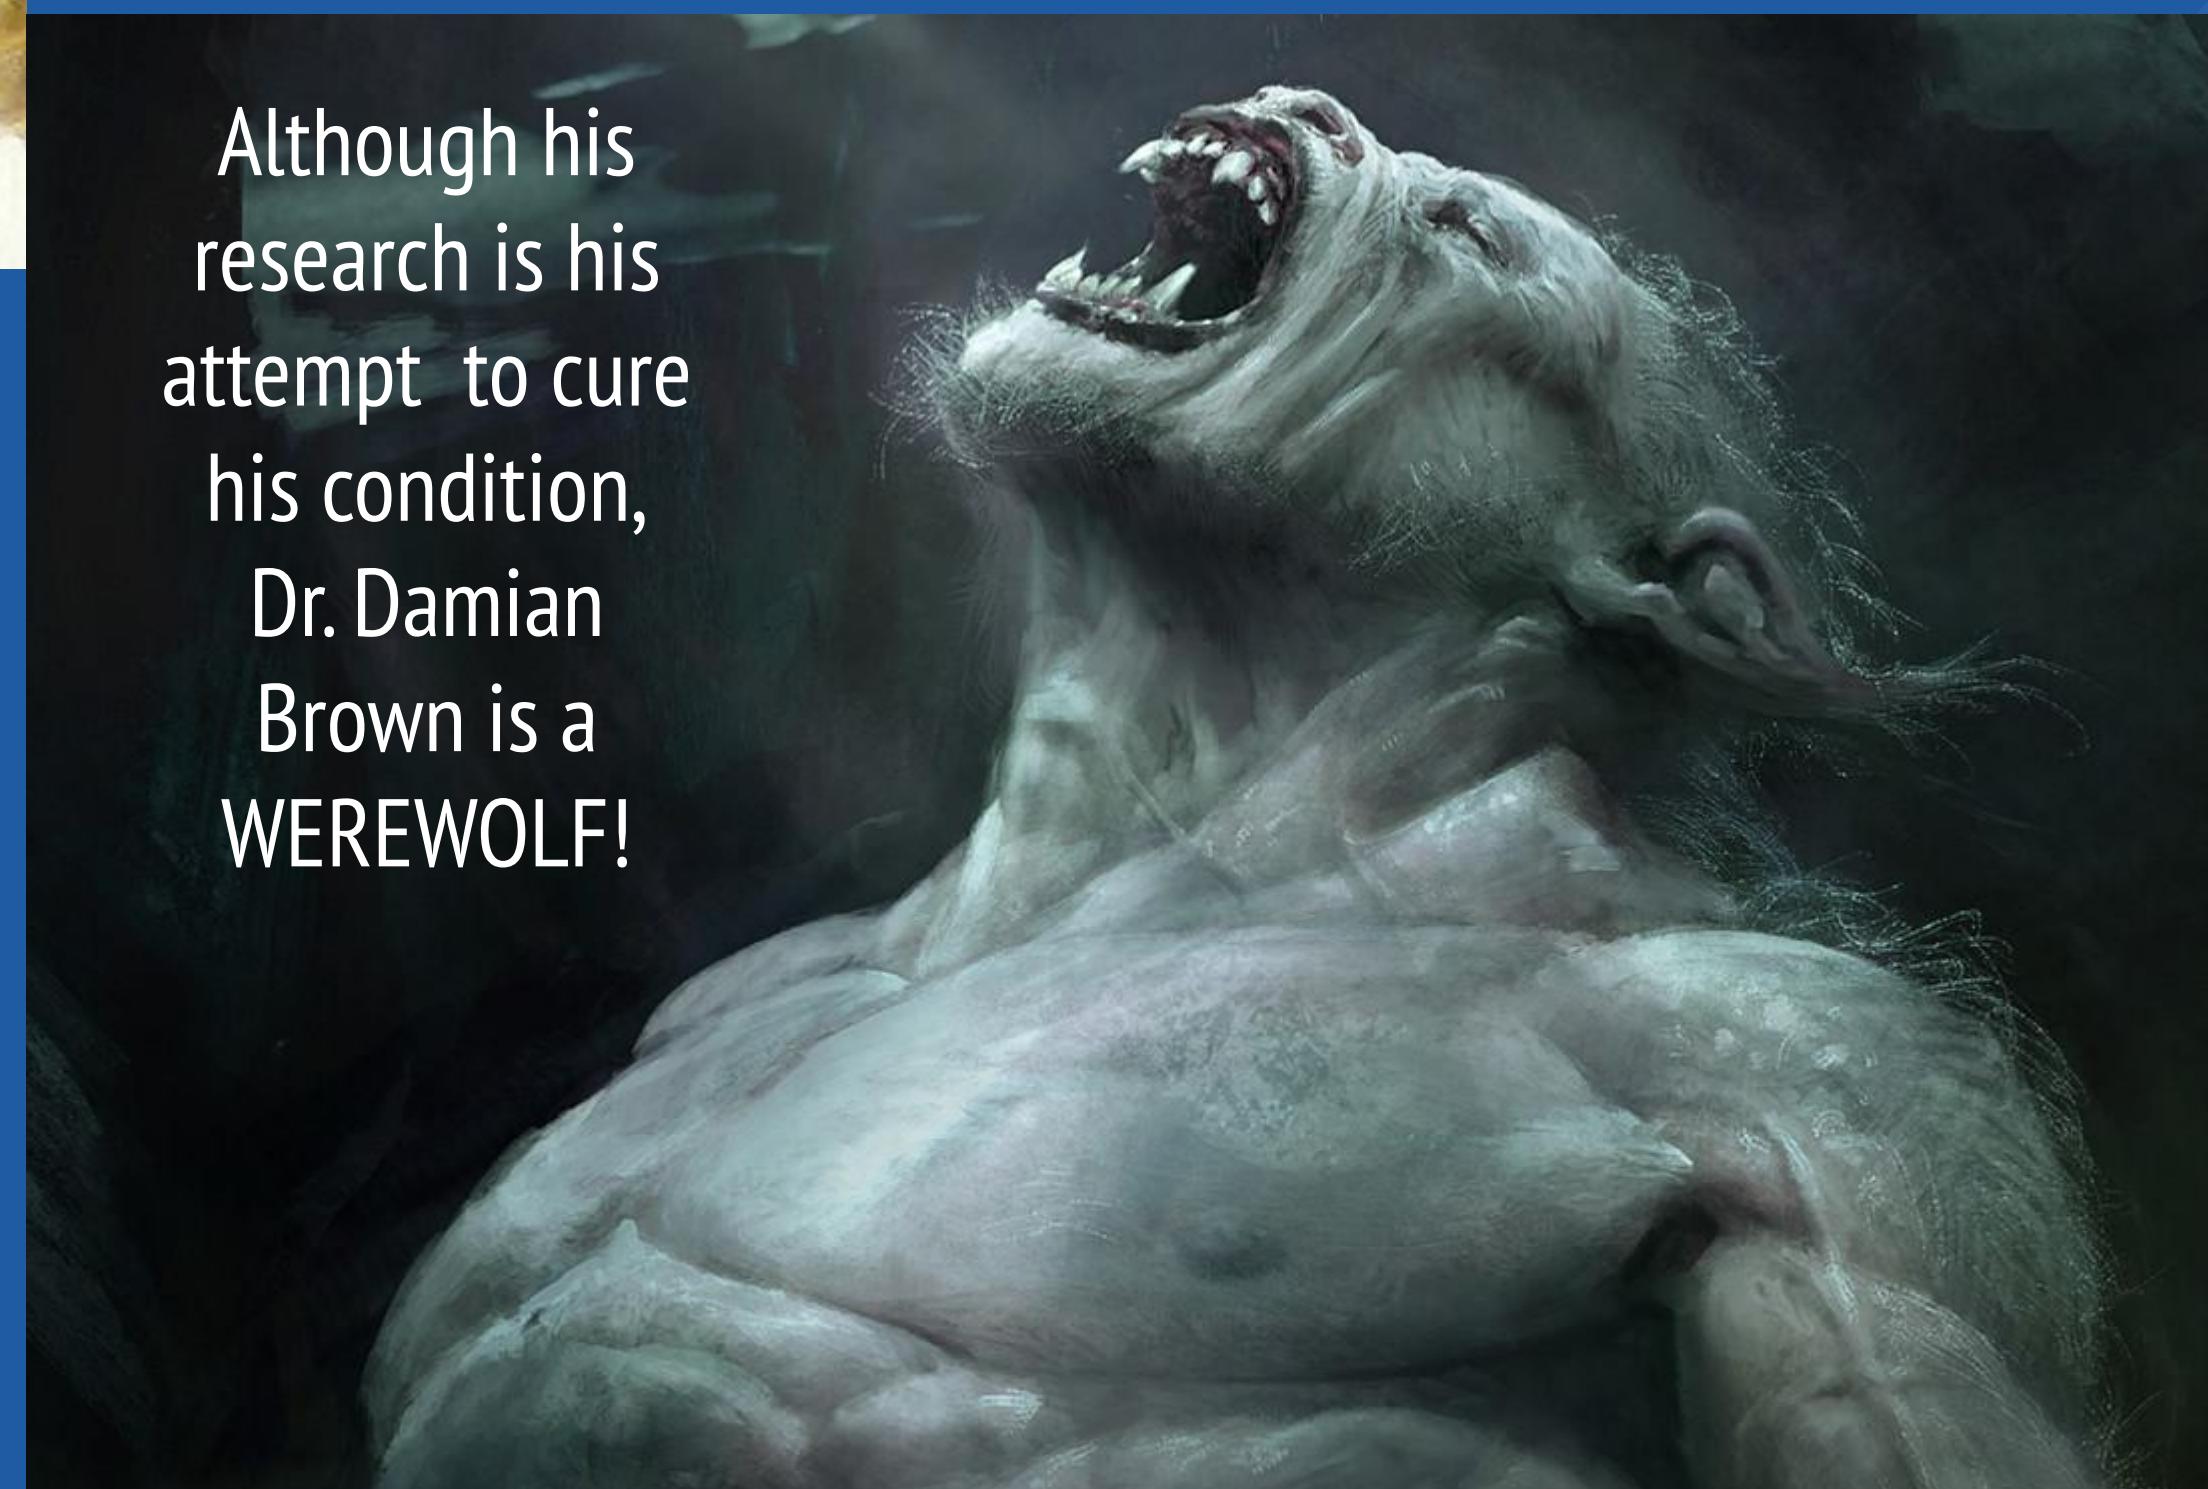

Olivia connects with Damian and explains her situation. Taking pity on her, Damian admits Luna into the hospital, promising to cure her. He also grants Olivia a residency so she can pursue her dreams of being an MD.

Her first day on the job, she's able to contribute to solving a medical mystery and saving a life.

Just as this seems too good to be true, she stumbles on Damian's secret: the self-experimentation? the rumors of drug use? the erratic behavior? the concern he may be ill?

There's a logical (but shocking) explanation:

Although his research is his attempt to cure his condition, Dr. Damian Brown is a WEREWOLF!

FORMAT

The A STORY of every episode will be a CLOSED-END, SELF-CONTAINED MEDICAL MYSTERY, which takes cues from all of the timeless greats from HOUSE, ER, GREY'S ANATOMY, THE GOOD DOCTOR and NEW AMSTERDAM.

Through the eyes of Olivia and Damian, we are introduced to a patient with no hope.

Supporting Olivia and Damian are a compelling staff of world-class experts, researchers, teaching doctors and nurses, who will attack the problem in a way that amplifies the LIFE AND DEATH STAKES and EMOTION.

The patients will be powerful characters, in and of themselves, deeply affecting Olivia and Damian. Whether the patients recover or perish, they will leave a lasting mark on Olivia and Damian, altering their course across the season.

The fact that Luna, Olivia's daughter, is also in the same hospital, her life also in the balance, is never far from Olivia's mind, affecting the way she relates to every patient and fueling her to give 110% to every perplexing medical mystery.

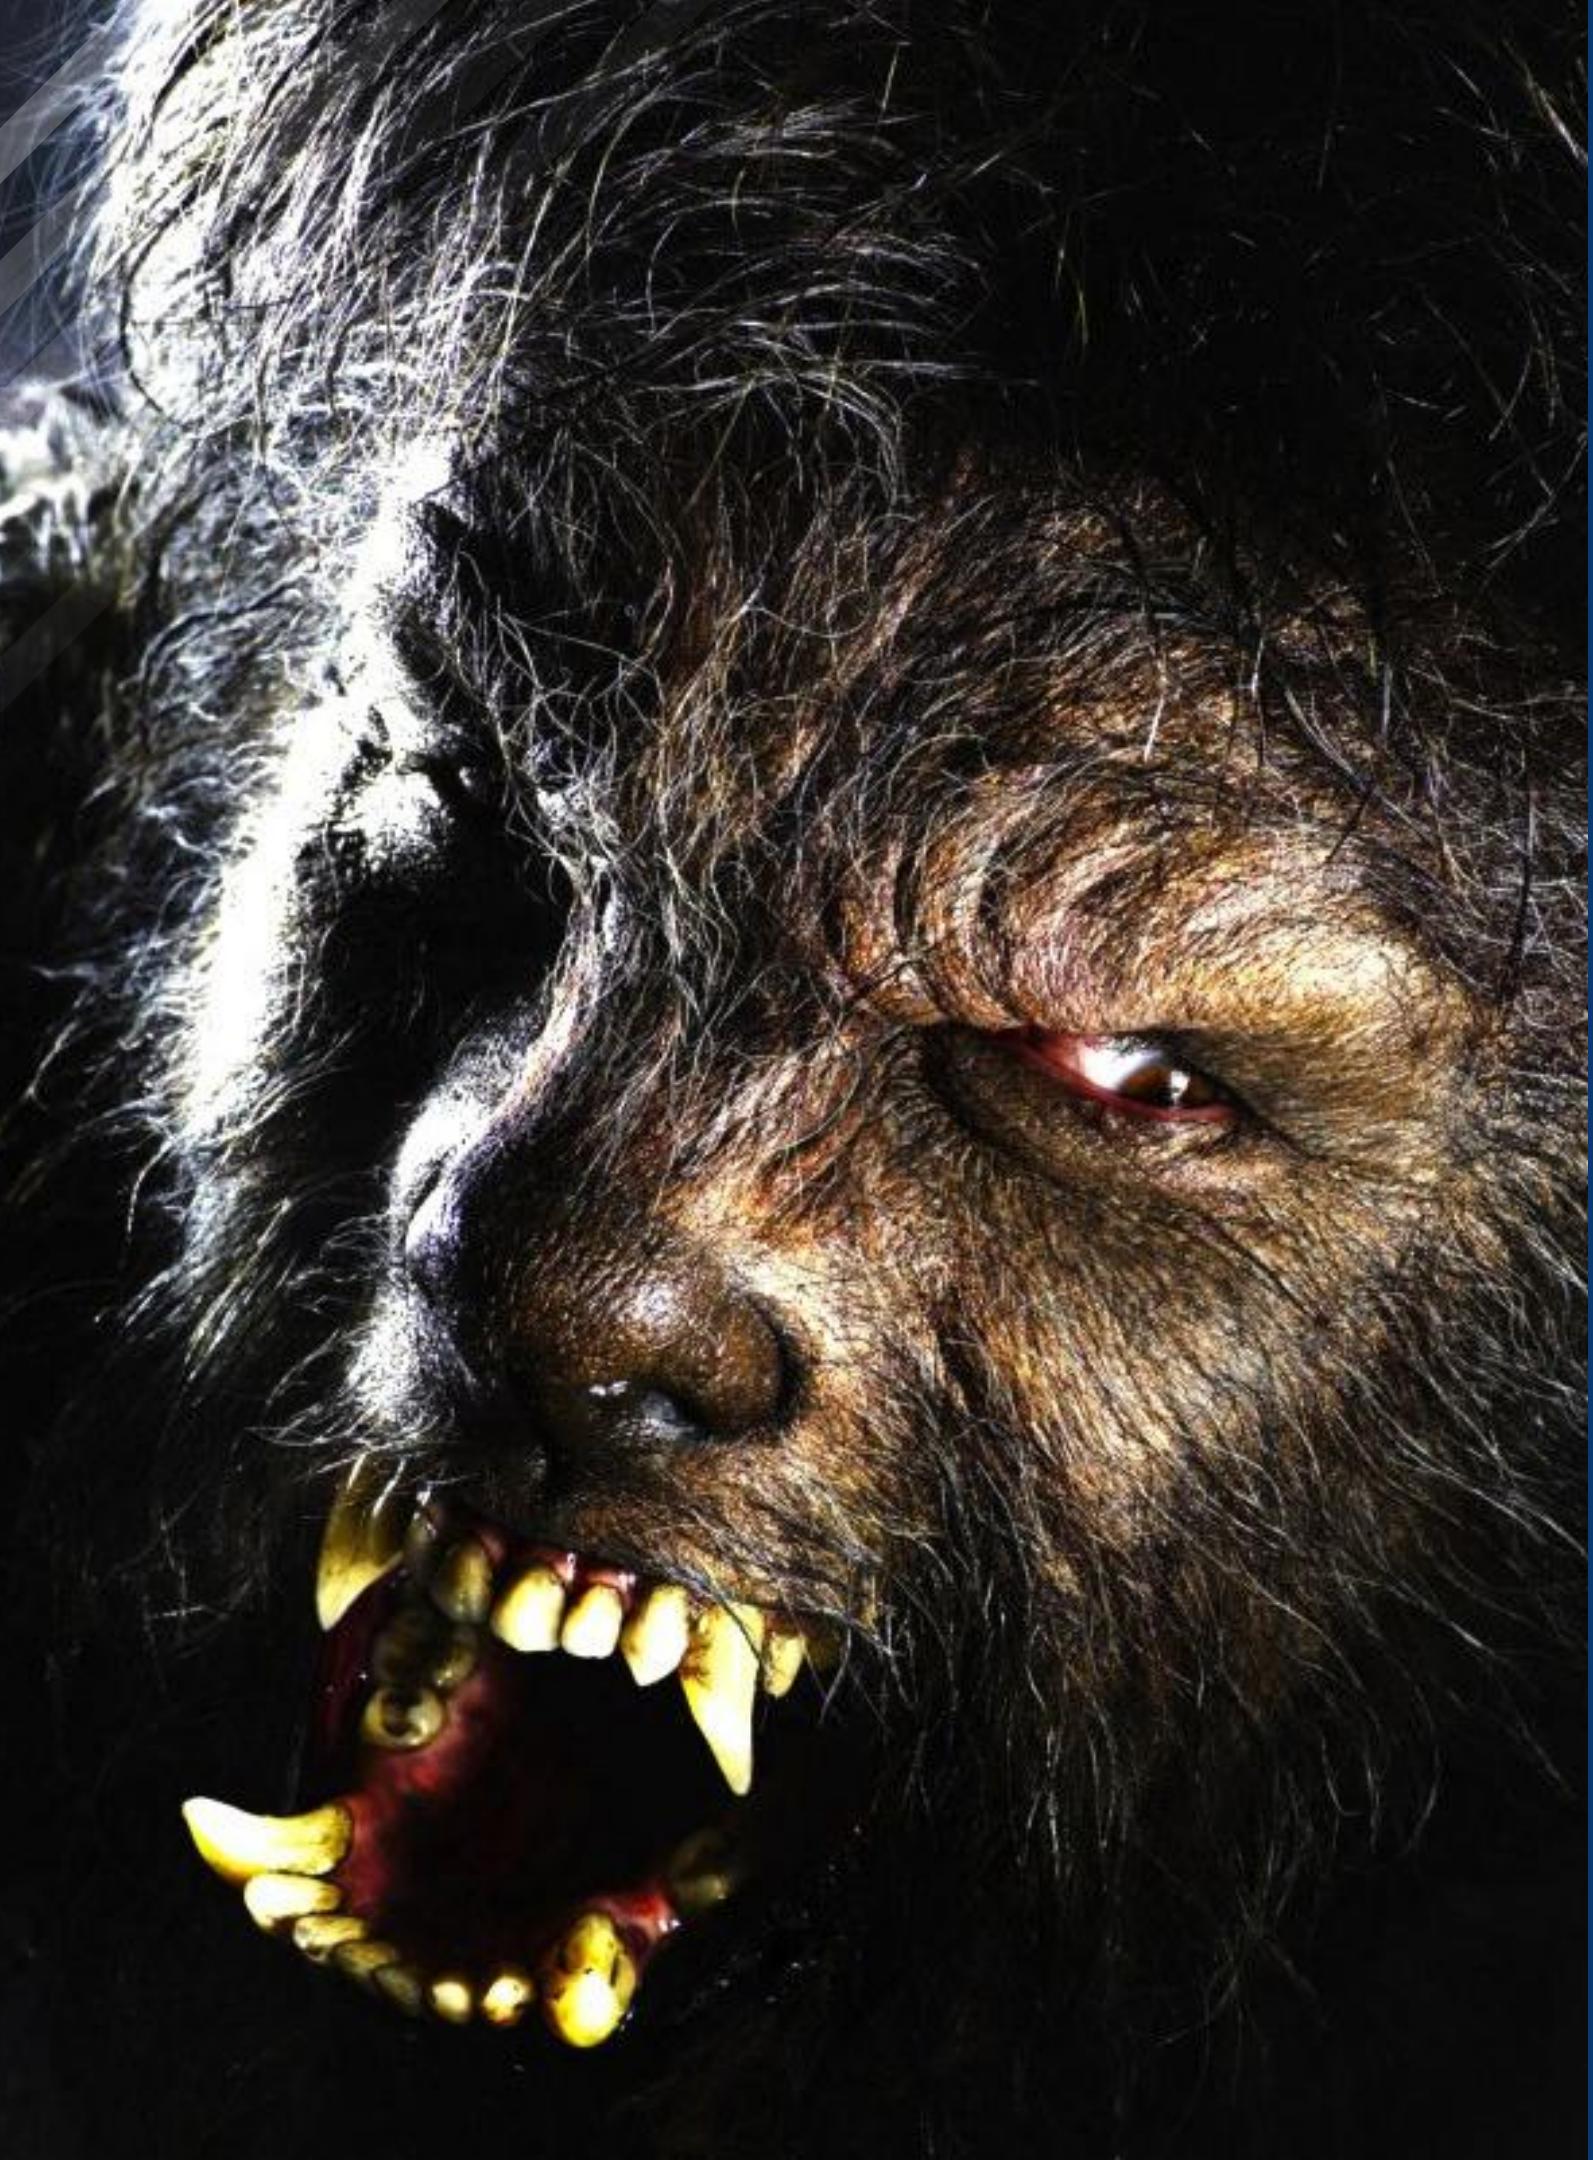

Meanwhile, Damian's own struggles affect him, making him surly, short-tempered and a tough taskmaster.

What makes the medical mysteries in this show extra special and unique is that we will take pains to focus on the **BLEEDING EDGE OF SCIENCE** and bring the latest and greatest medical advances into the world of the show.

The hospital is the last hope for every patient who enters, so the solutions to their issues **HAVE TO SEEM ALMOST LIKE SCIENCE FICTION**, but we will make sure that each solution is **GROUNDED IN THE MOST UP-TO-DATE MEDICAL THEORY**.

In a world where medicine is denigrated, a stealth agenda of this show will be to celebrate human advancement and staving off the spectre of death with the power of real science.

The RUNNER of the show, that ticks along in the background and provides some SERIALIZED PROPULSION is the WEREWOLF WAR.

We learn that:

Damian's family are billionaires, thanks to their pharmaceutical business.

When his parents died, Damian took control of the family business. His younger brother, SILAS, a reckless playboy, resented him.

To gain power, Silas sought out a way to become more powerful and crossed paths with a sinister Catholic Priest/werewolf named TURNER.

Now a werewolf, Silas attacked Damian, attempting to kill him. He learned werewolves are almost immortal when Damian survived.

Frustrated that Damian lives, Silas commits to learning all he can about lycanthropy.

Meanwhile, Damian meets and marries JULIA, confiding in her that he turns into a werewolf when his passions are aroused. She helps him stay locked up and under control, keeping his secret safe.

Silas learns that if he can kill a werewolf while in his wolf form, his death is permanent, whereas in his human form, his wolf blood can save him. He attacks and provokes Damian to change. The brothers, both in werewolf form, battle – but the only casualty is JULIA!

WHEN OUR STORY BEGINS, Damian is using his position at his pharmaceutical company to devise a way to suppress and eventually cure his lycanthropy.

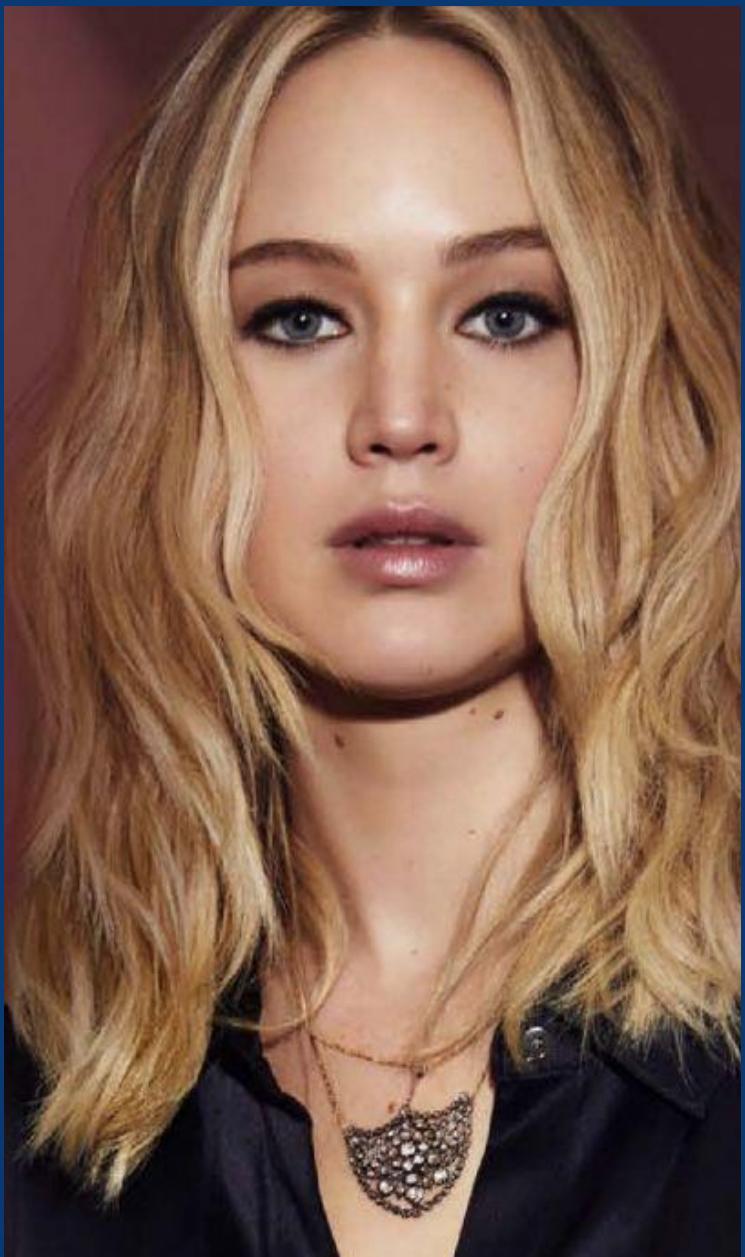

Silas and Turner, however, are building a small army of werewolves, intent on not only killing Damian, but taking over all of New York City for themselves!

CHARACTERS

CHARACTERS

OLIVIA

Saving her daughter, patients... and Damian

DAMIAN

CEO. Genius. Werewolf, refuses to fall in love until he curse himself

MAX

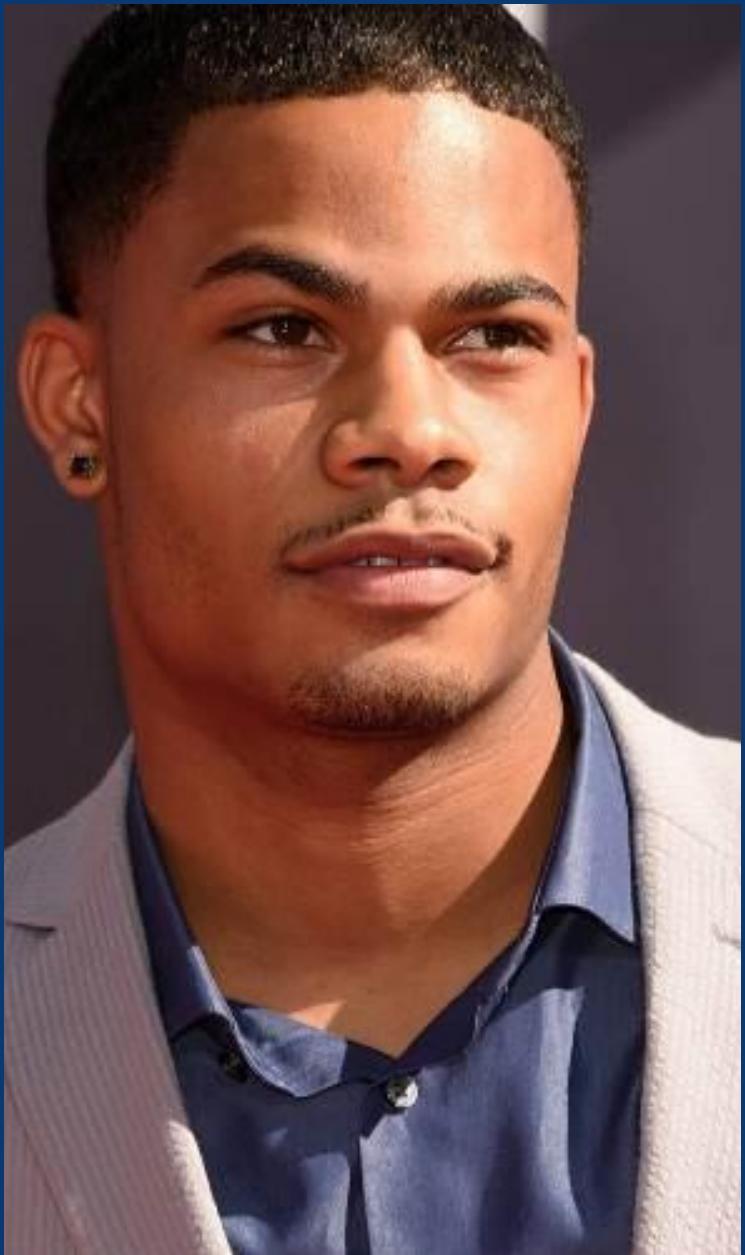

Reporter. Olivia's "friend with benefits". Exposing Damian's secrets for... reasons

MIN SUN

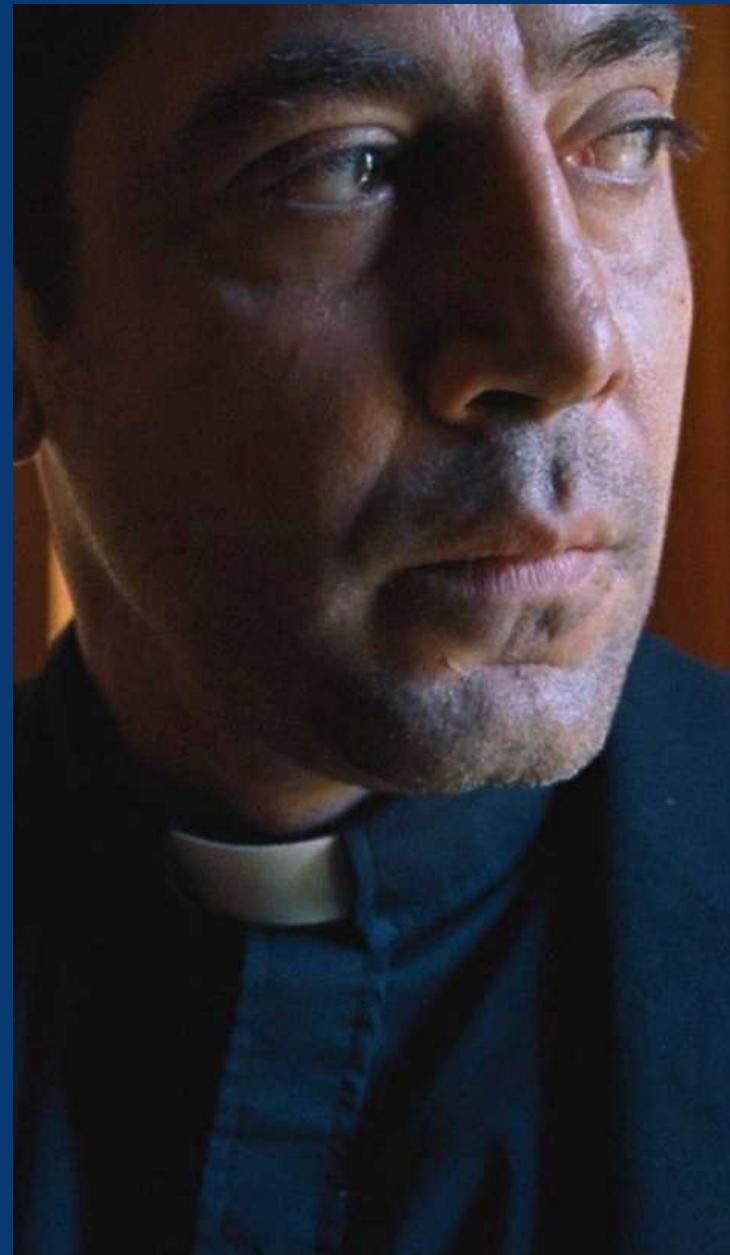

Olivia's BFF, Luna's babysitter and the "cupid" pushing Olivia and Damian together

CHARACTERS

SILAS

Damian's brother,
worst nightmare and
the future King of NY

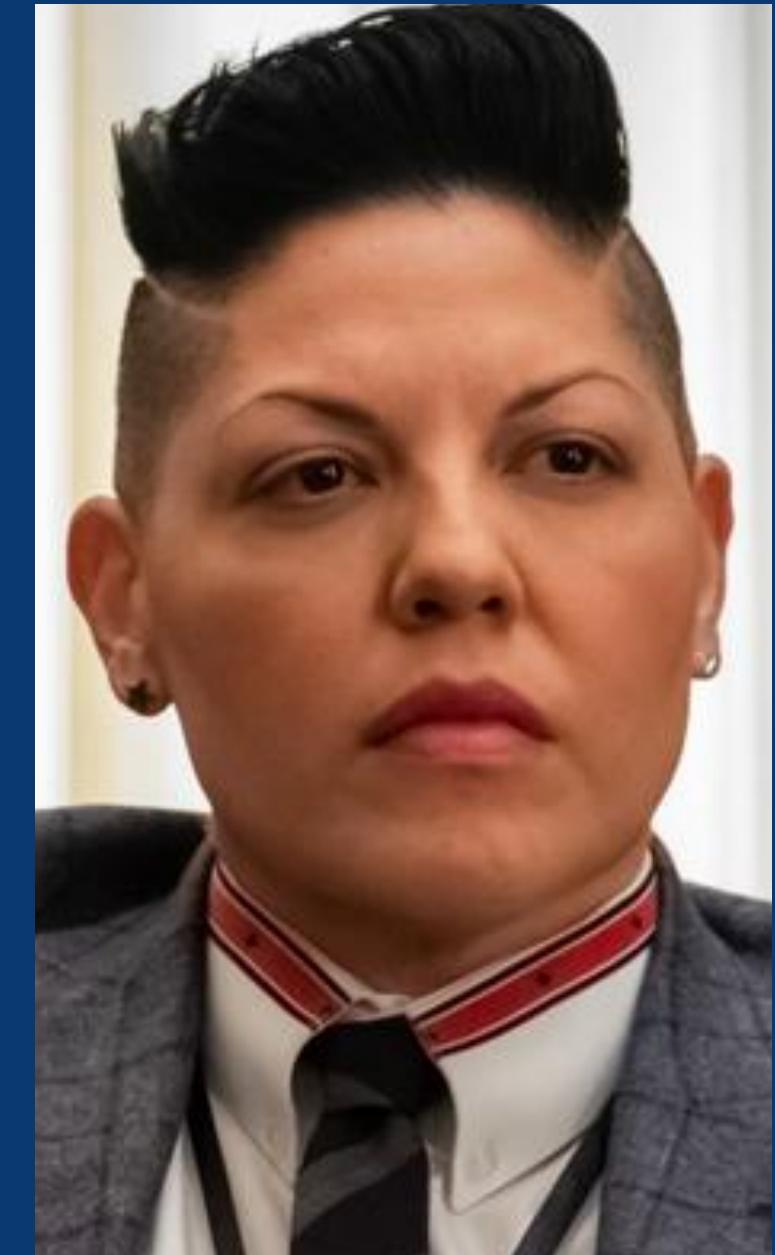

TURNER

Priest. Werewolf. Mastermind
behind Silas' war

TOMMY

Max's best friend, vet with
PTSD, turned into a werewolf
by Silas against his will

DR. RUSSELL

Damian's Chief of Staff, right
hand and the crucial person in
solving medical mysteries

THE SHOW WITH EVERYTHING

- Self Contained
- Cutting edge of real science
- Full of emotion
- High stakes

- Long arc, serialized storytelling
- Family drama aspect to give emotional weight
- Intriguing, complex mythology for fan engagement
- Action, suspense and VFX generate excitement

- Slow burn love story
- Steamy love scenes
- Love triangles and complications galore
- Big reveal: Olivia's husband NOT DEAD
